Oussama El Heni

Data Science Engineering Student — Full-Stack Developer · Machine Learning · Python

Tunisia | +216 96 505 383 | oussema.heni44@gmail.com | linkedin.com/in/heni-oussema-49269132b | github.com/Henixu

PROFILE

Data science engineering student at TEK-UP University with a Licence in Information Systems Development (ISET Radès) and **4 internships** in web application development (Angular, Spring Boot, Django). Building machine learning, RAG / local LLM and computer vision projects alongside full-stack work. Looking for a work-study position or a job where I can build efficient, optimised solutions.

EDUCATION

Engineering Degree in Data Science — TEK-UP University
Tunisia · 2025 – Present

Licence in Information Systems Development (DSI) — ISET Radès
Radès · 2022 – 2025

- Final project at Sopra HR Software

PROJECTS

SopraHR Interne (End-of-Studies Project) — github.com/Henixu/PFE_AI_Project
Angular, Spring Boot, PostgreSQL
Internal company management web application centralising a company's internal information and activities in a single platform, including training, sessions, users and progress tracking.

SmartBike AI — github.com/Henixu/SmartBike-AI
Django, Python, Machine Learning
Bike rental platform (find, reserve, pay, rent) with bike-demand prediction using multiple linear regression, helping administrators rebalance stations before shortages.

Spoortify — github.com/Henixu/spoortify
MediaPipe Pose, Computer vision
Real-time two-player push-up battle where the camera is the referee; reps are counted on-device with MediaPipe Pose and no video is recorded or uploaded.

Nidix CarRAG Studio — github.com/Henixu/Nidix-Ai
FastAPI, MongoDB, Ollama, RAG
Local RAG assistant that indexes vehicle records, retrieves the most relevant content and has a local LLM answer using only the indexed context.

EXPERIENCE

Intern — Kernel Solutions & Innovation
Jul 2026 – Aug 2026

- Built TounesPrix (github.com/Henixu/tounesprix), a Tunisian tech price-comparison platform that collects local store listings, matches equivalent products and stores prices in MongoDB.
- Exposed the data through an Express API and a Next.js web app: product browsing, store price comparison, offer details and price statistics.
- Developed the administrator side: management of products, stores, prices, users and uploaded images, with dashboard analytics.

End-of-Studies Intern — Full-Stack Developer — Sopra HR Software
Jan 2025 – May 2025

- Designed and developed an internal training and learning platform centralising a company's internal information and activities.
- Implemented training, session and user management with learner progress tracking.
- Built the frontend in Angular and the backend in Spring Boot (Java) on PostgreSQL.

Developer Intern — Shamash-IT
Jan 2024 – Feb 2024

- Designed and developed a job-application management app (Angular, Django) to streamline the tracking and processing of applications.
- Automated the generation of application sheets with PlanetPress Workflow and Designer.

Developer Intern — Zimys
Jan 2023 – Feb 2023

- Developed a high-performance Python web scraping script that extracts, cleans and structures a large database of doctors' contact details from a medical website.

SKILLS

Languages: Python, Java, HTML, CSS
Data & AI: Machine Learning, RAG / local LLMs (Ollama), MediaPipe, Web scraping
Frameworks: Spring Boot, Angular, Django, FastAPI, Node.js / Express, Next.js
Databases: PostgreSQL, MongoDB
Tools: Git, GitHub, PlanetPress Workflow / Designer

LANGUAGES

French (Advanced) · **English** (Advanced)
